

Agape Day Spa

Eyelash Care

To keep your new lashes looking amazing, you'll want to do the following religiously;

- Come to each reservation on time and with clean eyes that are free of all makeup and oils.
 - Clean your lashes daily with Baby shampoo.
- Brush your lashes when needed and preferably when they are wet.
- Use oil-free make up removers only! The oil can/ will make your lashes fall out!
- Use non waterproof, liquid, eyeshadow or gel eyeliners to line your eyes.
- If you want to wear mascara, only use mascara for non-natural lashes. You won't need to wear it though!!!

Do Not

- Rub or pull your extensions
 - Use any oil based products around the lashes
- Airbrush tanning should be done 24-48 hours before your reservation and wait 48 hours to use a tanning bed.
 - Use an eyelash curler!
- Avoid touching your lashes. There are natural oils on our fingertips.

- Cut or trim your new lashes. You can end up cutting your natural lashes.
- Sleep on stomach. Try to sleep on your side or back to avoid pulling them out.
- Most importantly- Don't worry if you lose an extension. This is a natural process of your natural lashes; this means there is NEW growth right behind it and it will be ready to adhere your new extension too!
